## PROGRAM/SEMINAR/BENGKEL/TAKLIMAT ANJURAN ILSM

### KURSUS TEKNIK PENSAMPELAN

9 – 11 Mei 2023

21 orang

### PENGENALAN STATISTIK TENAGA BURUH, GAJI & UPAH DAN SEKTOR INFORMAL

16 – 18 Mei 2023

16 orang

### KURSUS SAINS DATA 1 – ASAS

16 – 18 Mei 2023

23 orang

### KURSUS INFOGRAFIK

23-25 Mei 2023

20 orang

### PENLIBATAN WARGA DOSM DALAM PROGRAM LATIHAN PERINGKAT NASIONAL/ ANTARABANGSA SEBAGAI PESERTA

#### TRAINING COURSE ON “TRANSPORT STATISTICS”

Tarikh: 3 - 4 Mei 2023

#### Penganjur:

Statistical, Economic and Social Research and Training Centre for Islamic Countries (SESRIC)

Bilangan Peserta: 2 orang

Objektif kursus ini adalah untuk menyediakan gambaran keseluruhan statistik pengangkutan termasuk definisi, metodologi dan penyebaran datanya, serta pengalaman Indonesia dalam menjalankan Survei Suku Tahunan Statistik Pengangkutan.

#### E-LEARNING COURSE ON “IN-DEPTH TRAINING ON WATER ACCOUNTS”

Tarikh: 15 Mei – 23 Jun 2023

#### Penganjur:

United Nations Statistical Institute for Asia and the Pacific (UNSIAP)

Bilangan Peserta: 3 orang

Objektif kursus ini adalah untuk memperdalam pemahaman tentang air di System of Environmental Economic Accounting (SEEA) selaras dengan International Recommendations for Water Statistics. Kursus ini juga memperkenalkan konsep yang berkaitan dengan penyusunan statistik dan akaun air, serta penyusunan indikator SDG yang berkaitan.

#### TRAINING COURSE ON “AGRICULTURE STATISTICS AND FOOD SECURITY ANALYSIS”

Tarikh: 29 - 30 Mei 2023

#### Penganjur:

Statistical, Economic and Social Research and Training Centre for Islamic Countries (SESRIC)

Bilangan Peserta: 5 orang

Objektif kursus ini adalah untuk memberikan gambaran keseluruhan statistik pertanian termasuk liputannya, sumber data, unit statistik, kaedah pengumpulan data, pengalaman Indonesia untuk anggaran tanaman, bantuan pertanian, pengumpulan data pertanian bersepadu dan mampan, serta pengukuran dan analisis keselamatan makanan

### Childhood Obesity In Mexico: The Effect Of International Migration

This article estimates the effect of international migration from Mexico to the United States on the obesity status of children who remain in Mexico. Theory suggests that increased liquidity as well as changing time allocations resulting from migration may influence obesity outcomes. Natural disasters are used as an identification strategy. Results suggest that older boys in urban areas are more likely to become obese when either a male or female migrates from the household, while girls in urban areas are less likely to become obese. Both changes in food expenditure patterns and time use changes after migration are likely pathways that affect childhood obesity. While there are some changes in food expenditures, we find more importantly that urban girls engage in more housework and screen time after migration, whereas urban teen boys do not substitute for adult work as much as girls. These changes in strenuous activities, particularly for girls, likely explain the differential effect that migration has on boys' and girls' obesity outcomes in Mexico.

### Furlough And Household Financial Distress During The COVID-19 Pandemic

The Researcher study how being furloughed affects household financial distress during the COVID-19 pandemic in the United Kingdom. Furlough increases the probability of late housing and bill payments by 30% and 19%, respectively. At the aggregate level, furlough increases the incidence of financial distress by 3.38 percentage points. To offset furlough-induced income reductions, individuals significantly reduce consumption and spend savings. Relative to unemployment, the potential alternative in the absence of a furlough scheme, furlough reduces the incidence of financial distress by 95%. Estimates show an 80% government contribution to furloughed workers' wages minimizes the incidence of financial distress at the lowest cost to taxpayers.
