MALAYSIA'S TAXATION SYSTEM

Malaysia's Taxation System: Contemporary Practices, Issues and Future Direction offers a clear and concise analysis of Malaysia's taxation system in terms of its origin and its adaptation to changing economic and social conditions.

With unique insights from experienced legal, accounting, and tax practitioners and eminent academics, this book highlights the need for a holistic review of the taxation system going forward as the country strives for high-income status in the near future.

FROM POVERTY TO POWER

From Poverty to Power argues that a radical redistribution of power, opportunities, and assets rather than traditional models of charitable or government aid is required to break the cycle of poverty and inequality. The forces driving this transformation are active citizens and effective states. Why active citizens? Because people living in poverty must have a voice in deciding their own destiny and holding the state and the private sector to account. Why effective states? Because history shows that no country has prospered without a state structure that can actively manage the development process.

MICRO TRENDS

Relying on some of the best data available, Penn identifies more than 70 microtrends in religion, leisure, politics, and family life that are changing the way we live. Among them:

- *People are retiring but continuing to work.*
- *Teens are turning to knitting.*
- *Geeks are becoming the most sociable people around.*
- *Women are driving technology.*
- *Dads are older than ever and spending more time with their kids than in the past.*

You have to look at and interpret data to know what's going on, and that conventional wisdom is almost always wrong and outdated. The nation is no longer a melting pot. We are a collection of communities with many individual tastes and lifestyles. Those who recognize these emerging groups will prosper.

THE LEADING INDICATORS

“The leading indicators” shape our lives intimately, but few of us know where these numbers come from, what they mean, or why they rule the world. GDP, inflation, unemployment, trade, and a host of averages determine whether we feel optimistic or pessimistic about the country’s future and our own. They dictate whether businesses hire and invest, or fire and hunker down, whether governments spend trillions or try to reduce debt, whether individuals marry, buy a car, get a mortgage, or look for a job.

Zachary Karabell tackles the history and the limitations of each of our leading indicators. The solution is not to invent new indicators, but to become less dependent on a few simple figures and tap into the data revolution. We have unparalleled power to find the information we need, but only if we let go of the outdated indicators that lead and mislead us.

ECONOMIC DECISION MAKING USING COST DATA

A firm maximizes profits if each decision adds more to the firm's revenue than to its costs. Although the concept sounds rather simple, it is difficult to do in practice. To ease this difficulty, the authors are giving you the inside knowledge to 'economic theory.'

This book will help you understand economic theory and much more to accurately infer changes in revenues that may be associated with a decision. And since economic theory suggests that the costs reported by accountants rarely reflect the true cost associated with the decision, this book will help you understand how to assess the changes in revenues and costs. Demand and price sensitivity analysis allow you to infer revenue changes, and this book helps you reconcile the economic theory of cost with common accounting practices so the differences can be reconciled and better decisions can be made.

MANAGERIAL ECONOMICS FOR BEGINNERS

This book is written for both undergraduate and post graduate students to give them an insight and better understanding of the tools of business and managerial economics.

This book is arranged into 7 chapters and comes with schedules, diagrams, and examples of calculations. Sample questions and answers are also provided at the end of each chapter for students to assess themselves. Chapter One examines the nature and scope of managerial economics. Chapter Two reviews the optimisation technique showing how a firm seeks to achieve its aims and objectives most efficiently subject to constraints. Chapters Three and Four analyze the demand theory, the empirical estimation of demand and demand forecasting. Chapters Five and Six presents the theory and measurement of the firm's production and costs.

A complete presentation and discussion of input substitution in production and short and long run cost curves is also covered in Chapter Six. Finally, Chapter Seven analyses how price and output are determined under various forms of market organisation.

CREATING INNOVATORS

Harvard education expert Tony Wagner explores what parents, teachers, and employers must do to develop the capacities of young people to become innovators. In profiling compelling young American innovators such as Kirk Phelps, product manager for Apple's first iPhone, and Jodie Wu, who founded a company that builds bicycle-powered maize shellers in Tanzania, Wagner reveals how the adults in their lives nurtured their creativity and sparked their imaginations, while teaching them to learn from failures and persevere. Play, passion, and purpose: These are the forces that drive young innovators.

Wagner takes readers into the most forward-thinking schools, colleges, and workplaces in the country, where teachers and employers are developing cultures of innovation based on collaboration, interdisciplinary problem-solving, and intrinsic motivation. The result is a timely, provocative, and inspiring manifesto that offers crucial insight into creating the change makers of tomorrow.

YOU CAN BE HAPPY

Do you feel that there's more room for a bit more happiness in your life? A lot more even?

Then here's the good news: you have much more control over your happiness than you can probably think. And in this book, you'll discover the often simple, but easily overlooked, steps you can take to reclaim more of those good feelings.

What's more, every single suggested action in this book has been scientifically proven to have a positive and lasting effect on happiness. There's no hype here, just plenty of real hope. Better still, there's no need for radical life change and no complicated programme to follow. Instead you'll find a raft of small and simple steps that will, over time, add up to a life with more pleasure and meaning - and with fewer negative emotions dragging you down.

Nobody else can make you happy. But you can. Here's all the help you need.

PENGURUSAN AWAM BARU DAN PEMPOLITIKAN DALAM SEKTOR AWAM MALAYSIA

Pengalaman Barat mengakui kesukaran dan ketidakcekapan akan timbul jika politik dan pentadbiran diurus secara berasingan. Oleh itu, Barat memperkenalkan model Pengurusan Awam Baru (PAB) hasil evolusi birokrasi dan pengurusan saintifik bagi membenarkan campur tangan politik mengatasi suasana gridlock dalam pelaksanaan dasar awam. Ironisnya, Malaysia mengalami evolusi pentadbiran awam yang berbeza.

Buku ini mengupas titik-temu politik dan pentadbiran yang sudah berakar dalam birokrasi, pengurusan saintifik dan PAB yang mana ia berbeza dengan pengalaman negara-negara Anglo-Saxon. Perbezaan ini menggesa agar PAB ditakrif dan diurus semula dengan memperkenalkan procedural justice untuk menyelaras sempadan campur tangan politik dalam pengurusan awam bagi memperkasa integriti dan akauntabiliti pentadbir awam.

TADBIR URUS EFEKTIF, POLITIK DAN KUALITI: PERSPEKTIF ISLAM DAN KONTEMPORARI

Bidang tadbir urus adalah ilmu berkaitan kenegaraan yang sentiasa berkembang dan perlu difahami oleh setiap lapisan masyarakat. Justeru, Tadbir Urus Efektif, Politik dan Kualiti: Perspektif Islam dan Kontemporari memuatkan pelbagai perbincangan menarik dalam tiga ruang lingkup perbincangan ilmu, iaitu tadbir urus, politik dan pengurusan kualiti dan dikupas menerusi dua perspektif, iaitu Islam dan kontemporari.

Perbincangan menggabungkan beberapa aspek penting meliputi konsep, prinsip, falsafah, nilai dan etika, proses, peranan masyarakat, contoh daripada sejarah Islam dan juga aplikasinya dalam amalan semasa institusi Islam di Malaysia. Pembaca dengan ini akan mendapat suatu kefahaman komprehensif berkaitan tadbir urus efektif secara teori dan amalannya.

TERIMA KASIH
