STATISTICS : A GRAPHIC GUIDE

From the medicine we take, the treatments we receive, the aptitude and psychometric tests given by employers, the cars we drive, the clothes we wear to even the beer we drink, statistics have given shape to the world we inhabit.

For the media, statistics are routinely 'damning', 'horrifying', or, occasionally, 'encouraging'. Yet, for all their ubiquity, most of us really don't know what to make of statistics. Exploring the history, mathematics, philosophy and practical use of statistics, Eileen Magnello - accompanied by Bill Mayblin's intelligent graphic illustration - traces the rise of statistics from the ancient Babylonians, Egyptians and Chinese, to the censuses of Romans and the Greeks, and the modern emergence of the term itself in Europe. She explores the 'vital statistics' of, in particular, William Farr, and the mathematical statistics of Karl Pearson and R.A. Fisher. She even tells how knowledge of statistics can prolong one's life, as it did for evolutionary biologist Stephen Jay Gould, given eight months to live after a cancer diagnoses in 1982 - and he lived until 2002.

This title offers an enjoyable, surprise-filled tour through a subject that is both fascinating and crucial to understanding our world.

STATISTICAL METHODS FOR APPLIED RESEARCH

The main objective of this book is to guide and help students or researchers who are using Statistical Package for the Social Sciences (SPSS) software in performing the statistical methods in their applied research.

Almost all of applied research need a statistical analysis in their researches. This book will give a straightforward solution to students and can also be used as a guideline in performing the statistical test using statistical analysis tools.

Hopefully this book will help students in making good presentations and conclusions based on the results obtained and provides valuable information in statistical methods in applied research.

A CONCEPTUAL GUIDE TO STATISTICS USING SPSS

This unique text helps students develop a conceptual understanding of a variety of statistical tests by linking the ideas learned in a statistics class from a traditional statistics textbook with the computational steps and output from SPSS

Each chapter begins with a student-friendly explanation of the concept behind each statistical test and how the test relates to that concept. The authors then walk through the steps to compute the test in SPSS and the output, clearly linking how the SPSS procedure and output connect back to the conceptual underpinnings of the test.

By drawing clear connections between the theoretical and computational aspects of statistics, this engaging text aids students' understanding of theoretical concepts by teaching them in a practical context.

GEN Z WORK

A generations expert and author of *When Generations Collide* and *The M-Factor* teams up with his seventeen-year-old son to introduce the next influential demographic group to join the workforce—Generation Z—in this essential study, the first on the subject.

They were born between between 1995 and 2012. At 72.8 million strong, Gen Z is about to make its presence known in the workplace in a major way—and employers need to understand the differences that set them apart. They're radically different than the Millennials, and yet no one seems to be talking about them—until now. This generation has an entirely unique perspective on careers and how to succeed in the workforce.

Based on the first national studies of Gen Z's workplace attitudes; interviews with hundreds of CEOs, celebrities, and thought leaders on generational issues; cutting-edge case studies; and insights from Gen Zers themselves, *Gen Z @ Work* offers the knowledge today's leaders need to get ahead of the next gaps in the workplace and how best to recruit, retain, motivate, and manage Gen Zers. Ahead of the curve, *Gen Z @ Work* is the first comprehensive, serious look at what the next generation of workers looks like, and what that means for the rest of us.

A well-run meeting is a goldmine of opportunity for Getting Things Done; it is where the diverse set of talents on your team come together into a whole of achievement it is your most valuable commodity. It's time to leave dusty, boring, time-sucking meetings in the past and revolutionize the way we come together.
