## BEYOND ECONOMIC MAN

Harvey Leibenstein

A New Foundation  
for Microeconomics

Harvey Leibenstein has written a major new book in microeconomic theory. It is a sophisticated reorientation of micro theory that breaks away from the conventional, highly refined neoclassical theory, which in turn is in the direct line of descent from Adam Smith's *The Wealth of Nations* (1776). The author accomplishes this feat by introducing modern psychological concepts to micro theory, by using individuals instead of collections of individuals as his basic units of study, and by suggesting that relating the theory to the concept of effort (an X-efficiency factor) will provide the most significant results. His innovative central variable, effort, is an X factor, he reminds us, because of its relatively unknown character in affecting output. The X-efficiency factors motivation, effort, and so on allow for a restatement of micro theory, and for new applications and new conclusions:

- (1) businesses do not minimize costs or maximize profits;
- (2) actual productivity is very far from optimal even under conditions that approximate competition;
- (3) current modes of regulating monopolistic industries are apt to be inefficient and at the expense of the consumer.

# QUALITATIVE RESEARCH: DATA COLLECTION & DATA ANALYSIS TECHNIQUES

## QUALITATIVE RESEARCH: DATA COLLECTION & DATA ANALYSIS TECHNIQUES

M. Puvenesvary  
Radziah Abdul Rahim  
R. Sivabala Naidu  
Mastura Badzis  
Noor Fadhilah Mat Nayan

[penerbit@uum.edu.my](mailto:penerbit@uum.edu.my)

Qualitative Research: Data Collection & Data Analysis Techniques is especially written for anyone who is interested in doing or learning more about qualitative research methods. The reader-friendly organization and writing style of the book makes it accessible to everyone-academics, professionals, undergraduates, postgraduates, researchers, and even for those who are just beginning to explore the field of qualitative research.

Each chapter provides a clear, contextualized and comprehensive coverage of the main qualitative research methods (interviews, focus groups, observations, diary studies, archival document, and content analysis) and will thus equip readers with a thorough understanding of the steps and skills to undertake qualitative research effectively.

# MACROECONOMIC: APPLICATION IN SOUTH EAST ASIAN COUNTRIES

This book covers major principles in macroeconomics and presents them in Islamic and South east Asian perspectives. The concepts of riba, the Islamic financial system, fiscal and monetary policies are thoroughly explored in the book from an Islamic point of view. Other topics explored in the book are national output and income, methods of their measurement, their relation to consumption and investment and demands for and supply of money. Besides, it describes roles of fiscal and monetary policies in stabilizing the economy of developing countries.

# THE CHETTIAR ROLE IN MALAYSIA'S ECONOMIC HISTORY

*The Chettiar Role in Malaysia's Economic History* seeks to evaluate the extent to which Chettiars were instrumental in the economic development of Malaya during British rule. Since the formation of the Federated Malay States in 1896 until Malaya gained its independence, the Chettiars emerged as one of the major financiers in the economic development of Malaya through their role in helping the Malays, Chinese and Indians to progress in the economic sector. However, the Chettiar role affected each of the three races differently, depending on factors such as the economic position of the respective races and British policy.

This book is essential in assessing the Chettiar role in the economic development of Malaya especially when the British failed to provide sufficient capital aid for local and foreign capitalists comprising the Malays, Chinese and Indians to develop the economic infrastructure and commercial economic activities such as rubber and tin mining. This book also highlights the role of the Chettiar, from indigenous money lenders to individuals who have been successful in various professions and are actively contributing toward the economic development of modern Malaysia.

# CONSTRUCTION INDUSTRY & ECONOMIC DEVELOPMENT: THE MALAYSIAN SCENE

This book describes the development of Malaysian construction industry within the context of the country's economic development. It focuses on the essence and consequences of Malaysia's economic development, the impact of the country's economic development on the growth and changes in construction output, the development of the contracting sector and issues relating to the industry's resources in response to the growth and changes in construction output, and the probable impact of future economic development on the construction industry. This book will be of interest to students from the field of construction and those who interested in the economics and development of the construction industry.

# 100 WAYS TO SAVE TAX IN MALAYSIA FOR SMALL BUSINESSES

**100 Ways to Save Tax in Malaysia for Small Businesses** presents clear explanations on key aspects of taxation of small and medium companies in Malaysia with valuable tax-saving ideas to enable businesses to fully use available tax breaks and incentives. This edition provides basic tax information to help owners better understand their tax liabilities and minimize their tax exposure and also supplies practical guidance on how tax payers can meet compliance requirements so as to stay clear of penalties and tax audits.

This book is a companion book to the highly-acclaimed **100 Ways to Save Tax in Malaysia for Individuals** which provides the same kind of help and guidance for individuals, including employees and company directors who are not personally in business.

# ISLAMIC WEALTH MANAGEMENT AND FINANCIAL ADVISORY: A STUDY GUIDE

This study guide should become handy to anyone who is interested to learn various spectrum of Islamic wealth management as it provides a step-by-step process in constructing a holistic financial plan through the use of case studies. It is a quick and easy guide on the area of wealth management, covering both theoretical and practical aspects. The guide features a question and answer format with examples and illustrations, where appropriate to show how it works in practice.

It is presented in the form of case studies that apply the knowledge of Islamic wealth management and financial advisory. Each case studies is supported by the key components of Islamic wealth planning which comprises of cash flow, assets and liability management, takaful and risk management, Islamic investment planning, zakat and tax planning, retirement planning, estate and waqf planning, with the objectives of testing the skills via analysis and evaluation. It is hoped that this study guide will serve as a significant reference to many in the wealth management industry.

# DIGITAL IMAGE PROCESSING AND COMPUTER VISION

Due to the rapid development of technologies, digital information playing a key role in our daily life and can be closely related to the social presence theory especially when referring to the social media aspect of images captured by our phones. The huge volume of stored and transmitted digital images, together with the efficient data acquisition and display techniques and devices demand novel, fast and intelligent algorithms for digital images manipulations.

Therefore, Image processing has become such a critical component in contemporary sciences and technology that many tasks would not be attempted without it. It is a truly interdisciplinary subject that draws from synergistic developments involving many disciplines. The developers should be able to solve problems with an innovation, creativity and active initiators of novel ideas. However, the learning and teaching has been changed from conventional and tradition education to outcome based education.

## "STATISTIK...SEGALANYA PASTI"

Tak kira walau apa  
Cabaran dan aral melintang  
Statistik meringankan  
Segala beban yang menjelma  
Gementar tiada

Tidak hanya berbicara  
Pagi hingga ke senja  
Semangat yang terus membara  
Data dan kehidupan berteraskan harapan  
dan impian kemakmuran

Bersama kita teguh hadapi  
Bentala dipenuhi misteri  
Namun statistik kan  
melindungi  
Statistik petunjuk realiti

Segalanya PASTI  
Bergalaskan strategi  
Menuju aspirasi  
Harapan.. Keamanan  
Impian... Kedamaian

Kesejahteraan negara  
Perpaduan seluruh bangsa  
Dengan irama data
