STATISTIK DALAM PENYELIDIKAN SAINS SOSIAL

Buku Statistik Dalam Penyelidikan Sains Sosial: Aplikasi dan Falsafah ini memberi pemahaman mengenai penyelidikan meliputi pengertian penyelidikan, hubungan penyelidikan dengan ilmu dan pengetahuan, kepelbagaian jenis penyelidikan, tujuan penyelidikan, fungsi dan kegunaan penyelidikan serta proses penyelidikan.

Buku ini juga membincangkan perumusan masalah, kajian literatur, perumusan konsep, hipotesis, dan pembolehubah, penentuan model dan pengujian hipotesis, penyediaan pengumpulan data, pengumpulan data penyajian data analisis dan interpretasi data penetapan umum dan membuat laporan penyelidikan.

Buku ini dapat membantu pelajar dan penyelidik dalam memahami statistik dalam penyelidikan dengan olahan dan perbincangan yang mudah difahami serta penjelasan lebih terperinci.

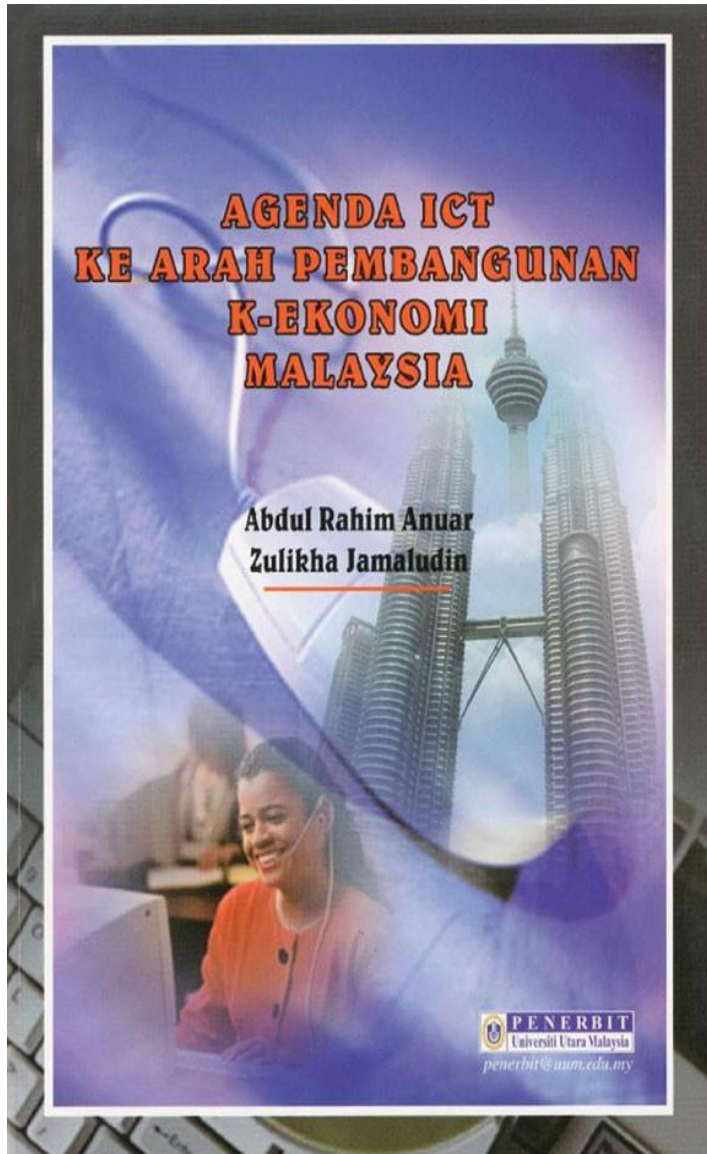

Principles of economics is specifically written to provide students with a thorough understanding of microeconomic and macroeconomic concept. It especially caters to students pursuing certificate, diploma and degree in the area of economics and business.

In this revised edition, the contents and presentation have been enhanced in order to keep up with the latest developments in the subject. Some important concepts such as market failure, and normative vs. positive analysis have been added to further improve the scope of the materials.

AGENDA ICT KE ARAH PEMBANGUNAN K-EKONOMI MALAYSIA

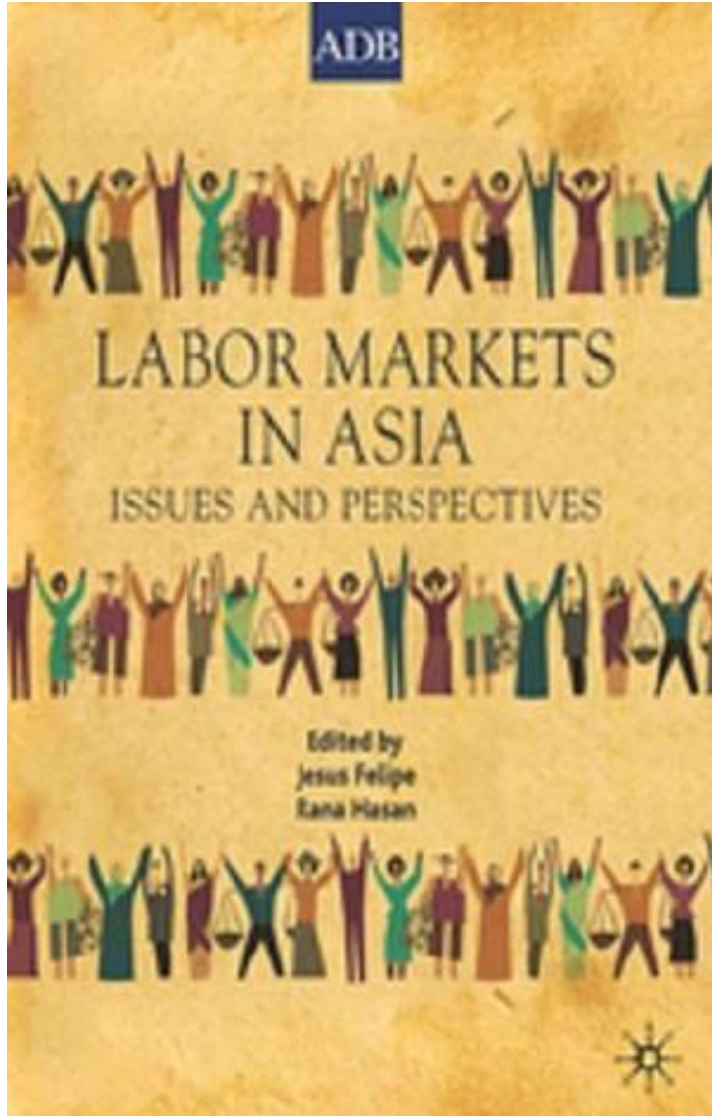

Justifikasi bagi pembentukan k-Ekonomi telah dijelaskan secara tidak langsung dalam Wawasan 2020. Pelancaran Multimedia Super Coridor (MSC) pada pertengahan tahun dekad 1990-an dan diikuti dengan pengenalan konsep k-Ekonomi dalam wacana pengurusan dan pembangunan ekonomi negara pada lewat dekad 1990- an serta pelancaran Pelan Induk Ekonomi Berasaskan Pengetahuan (PIEBP) pada awal tahun 2000 oleh kerajaan telah menjadi landasan bagi ekonomi negara untuk mencapai status k-Ekonomi menjelang tahun 2020.

Malah k-Ekonomi akan menjadi paradigma pembangunan ekonomi negara pada alaf ini. Buku ini, membincangkan kajian berkaitan laluan pembangunan k-Ekonomi dan agenda Information and Communication Technology (ICT) di Malaysia berdasarkan teras strategik dalam PIEBP serta tahap pencapaian program MSC khususnya aplikasi perdananya. Di samping itu penulis juga membincangkan peranan infrastruktur dan infostruktur dalam pembangunan K-ekonomi dan Ekonomi Digital. Walau bagaimanapun, berdasarkan petunjuk terpilih daripada World Competitiveness Yearbook (IMD), Human Development Index (UNDP), Digital Access Index (ITU), World Telecommunication Indicators (ITU), World Development Report (World Bank), Press Freedom Index (Reporters Without Border) dan Freedom House Index (Freedom House), Malaysia masih kekurangan dalam beberapa prasyarat ke arah mencapai status k-ekonomi.

LABOR MARKETS IN ASIA ISSUES AND PERSPECTIVES

Unemployment and underemployment are developing Asia's most important problems. On conservative estimates, the region is home to about 500 million workers who are either unemployed or underemployed. Therefore, helping people as workers is critical for poverty reduction.

Country specific studies for the People's Republic of China, India, Indonesia, Philippines, and Viet Nam undermine the case for across-the-board labor market reforms. Instead, the authors advocate well-designed, country-specific piecemeal reforms that target the particular policies which may inhibit employment creation.

The authors also argue that governments across developing Asia must bring the objectives of full, productive, and decent employment to the top of their agendas, and propose growth-promoting and human capital policies to achieve these objectives. In the authors' words: 'Unless these three objectives become a fundamental part of the macroeconomic agenda across developing Asia, it is easy to conceive a region, say 25 years from now, which, despite continuous growth, will still harbor most of the world's poor.'

TRANSFORMING STUDENT ENTREPRENEURSHIP: KNOWLEDGE SHARING BETWEEN INDONESIA AND MALAYSIA

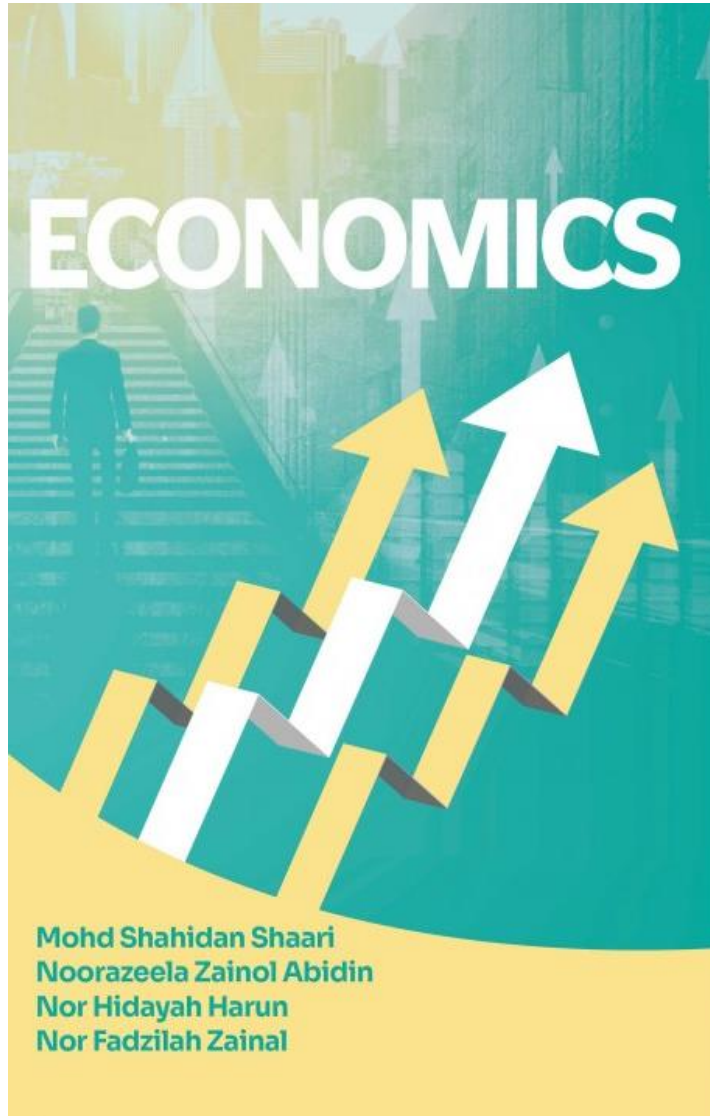

Transforming Student Entrepreneurship: Knowledge Sharing Between Indonesia and Malaysia

Entrepreneurship allows students to explore a different avenue for themselves and learn more than only their scope of study. Through entrepreneurship, students can build up their confidence and allow them to develop the right entrepreneurial mindset, attitudes and skills necessary to become successful entrepreneurs.

This book will give focus on chapters relating to existing entrepreneurial ventures or activities involving students at the respective universities in Malaysia and Indonesia. The discussion would be concentrated (but not limited to) on how student entrepreneurship is being developed or started, students' entrepreneurship events, key success factors, development of any form of student entrepreneurship program, success stories and students' engagement in entrepreneurial activities. The area of student entrepreneurship is hoped to set up a sound foundation on enhancing entrepreneurship development among students in both countries in the future.

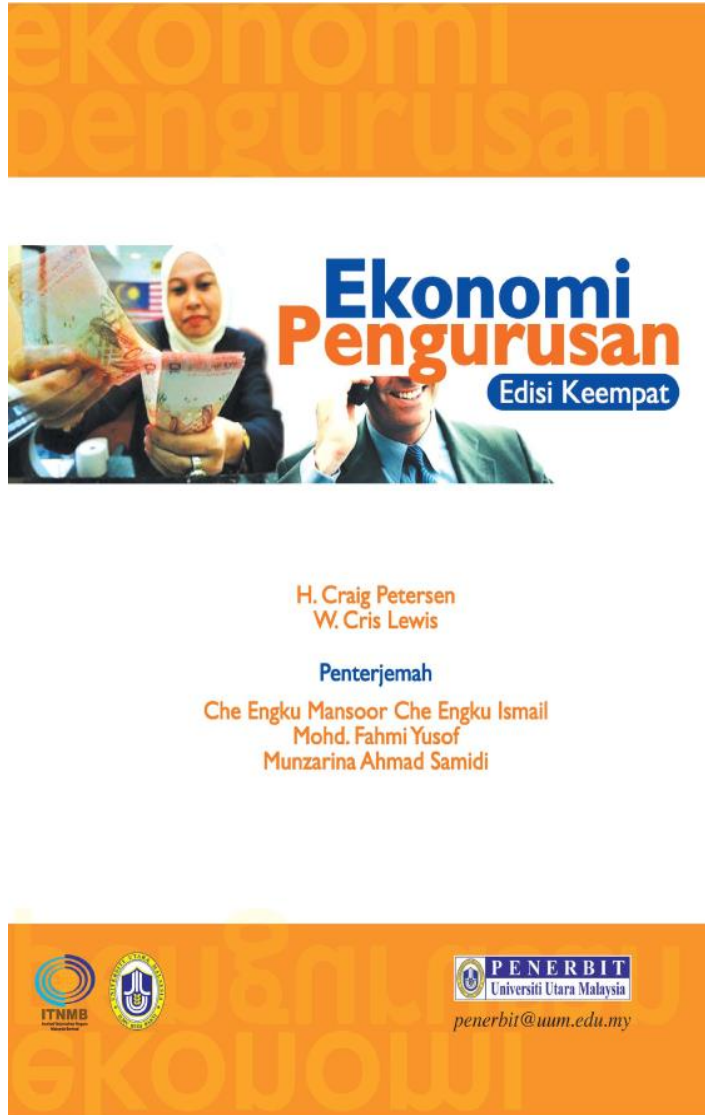

This book was purposely designed to explain economics knowledge through theoretical application that uses simple language and punctuated with current statistics and comprehensible examples.

The book comprises two branches: Microeconomics focuses on the decisions made by individual economic agents within the economy; like households, firms, and government, while Macroeconomics looks at the economy as a whole.

The book consists of 10 chapters. The first 6 chapters provide the students to view economics from the micro perspective and the remaining chapters are from a macroeconomics perspective. Microeconomics chapters include topics on Fundamental Economics, Demand and Supply, Market Equilibrium, Theory and Cost of Production, and Market Structures such as perfect competition, monopoly, monopolistic, and oligopoly. Macroeconomics focuses on broad chapters, such as business cycle, national income accounting, unemployment, and inflation. Readers can be assured of completing this book with a clear grasp on both branches of economics. Besides, each chapter is accompanied by a set of exercise that include structured and multiple choice questions to strengthen students understandings on this subject.

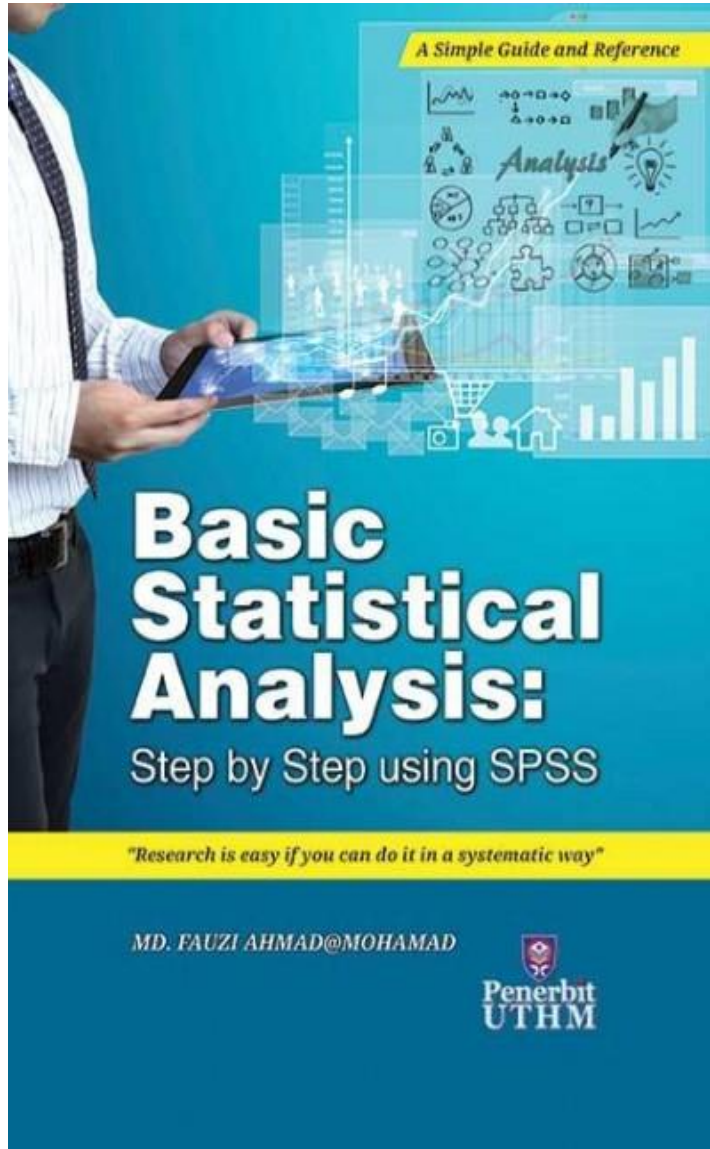

Ekonomi Pengurusan, Edisi keempat merupakan edisi yang telah dikemas kini dan disemak dengan teliti untuk menggambarkan persekitaran perniagaan yang begitu kompleks bagi para pengurus masa kini untuk membuat keputusan. Usaha juga telah dibuat untuk memastikan edisi baru ini tepat, terkini dan bersesuaian.

Profesor Peterson dan Lewis memperkenalkan kepada pelajar prinsip mikroekonomi asas selain menunjukkan bagaimana teori ekonomi boleh menambah baik pembuatan keputusan dalam pengurusan. Ini termasuklah memperkenalkan konsep asas ekonomi pengurusan dan menggunakan prinsip tersebut untuk menganalisis keputusan yang perlu dibuat oleh para pengurus.

Banyak kajian kes dan masalah berpenyelesaian dimasukkan dalam buku ini untuk menunjukkan bagaimana prinsip yang penting diguna pakai.

BASIC STATISTICAL ANALYSIS: STEP BY STEP USING SPSS

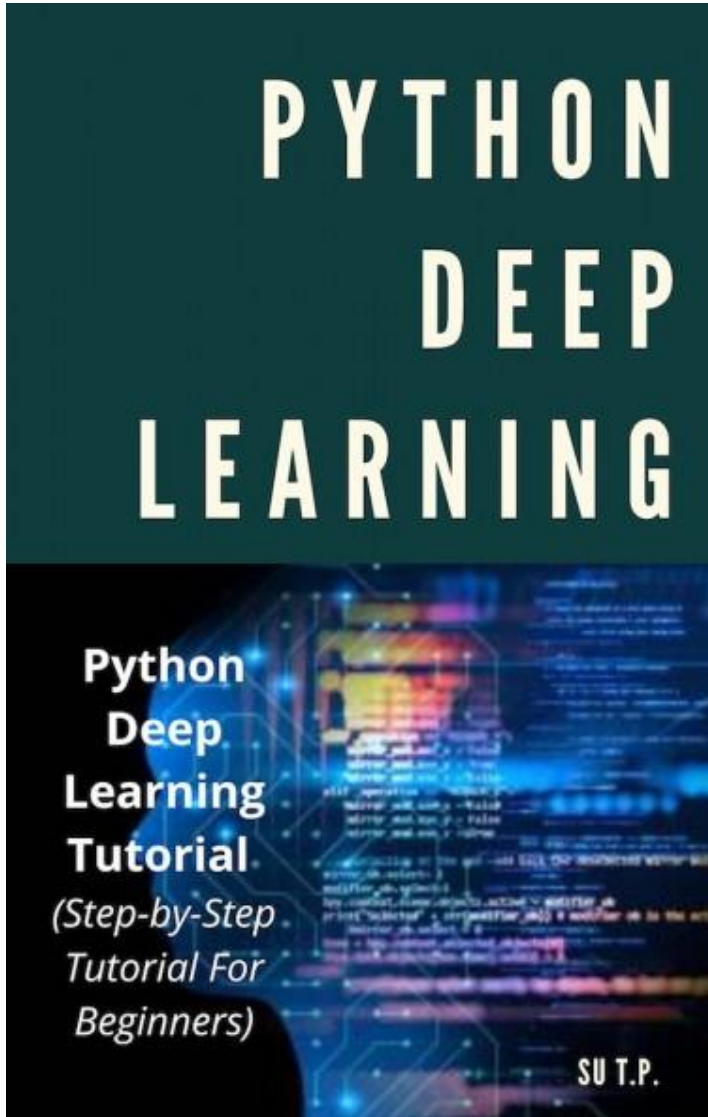

The main objective of this book is to provide step by step guidance in statistical analysis. It starts from explanation on type of statistical analysis, steps, results, interpretation and reporting.

This book will improve statistical analysis understanding amongst students and researchers. This book contains twelve chapters. In each chapter, examples of the statistical analysis are provided for better understanding using SPSS.

Furthermore, the interpretations of statistical result are explained in details for each of the examples. Hopefully this book will provide useful reference towards a better understanding in statistical analysis which shall lead to implementing successful research for students and researchers.

Python Deep Learning Tutorial (Step-by-Step Tutorial For Beginners) Python is a general-purpose high level programming language that is widely used in data science and for producing deep learning algorithms. This brief tutorial introduces Python and its libraries like NumPy, SciPy, Pandas, Matplotlib; frameworks like Theano, TensorFlow, Keras.

The tutorial explains how the different libraries and frameworks can be applied to solve complex real world problems. This tutorial has been prepared for professionals aspiring to learn the basics of Python and develop applications involving deep learning techniques such as convolutional neural nets, recurrent nets, back propagation, etc. Before you proceed with this tutorial, we assume that you have prior exposure to Python, Numpy, Pandas, Scipy, Matplotlib, Windows, any Linux distribution, prior basic knowledge of Linear Algebra, Calculus, Statistics and basic machine learning techniques.

Economic Geography

Past, present and future

Edited by

Sharmistha Bagchi-Sen and
Helen Lawton Smith

Routledge Studies in Economic Geography

The impact of economic geography both within and beyond the wider field of geography has been constrained in the past by its own limitations. Drawing together the work of several eminent geographers this superb collection assesses the current state of knowledge in the sub discipline and its future direction. In doing so, the contributors show how economic geographers have offered explanations that affect places and lives in the broader context of the global economy.

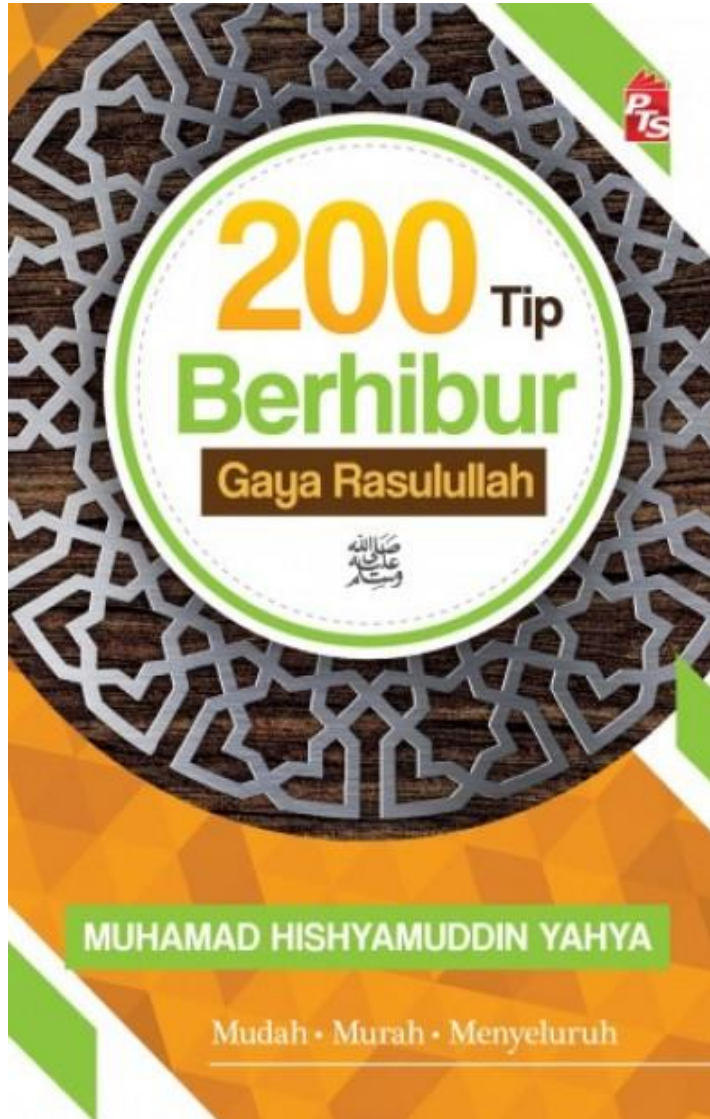

Offering a discussion of theoretical constructs and methodologies with the purpose to show the need to combine different approaches in understanding spatial (inter) dependencies, contributors also demonstrate the need to engage with multiple audiences, and within this context they proceed to examine how geographers have interfaced with businesses and policy.

This excellent collection moves economic geography from a preoccupation with theory towards more rigorous empirical research with greater relevance for public policy. With excellent breadth of coverage, it provides an outstanding introduction to research topics and approaches.

200 TIP BERHIBUR GAYA RASULULLAH

Buku 200 Tip Berhibur Gaya Rasulullah s.a.w. ini menyajikan bagaimana cara berhibur yang benar menurut Islam. Islam tidak melarang umatnya untuk berhibur, malah ia diharuskan. Hiburan membantu manusia untuk menjadi lebih tenang apabila berhadapan dengan situasi tegang akibat daripada masalah harian yang ditanggung.

Namun, hiburan ada batasnya yang perlu diambil berat. Jikalau batas hiburan yang digariskan Islam dilanggar, maka sesuatu hiburan itu boleh mengundang pelbagai keburukan lantas perkara itu membawa kepada haramnya hiburan itu.

AJAIBNYA SEDEKAH

Salah satu ajaran agama kita adalah sedekah. Selama ini, kita sering memandang sedekah sebagai sesuatu yang biasa. Siapa yang mahu bersedekah, silakan. Siapa yang tidak mahu, tidak mengapa. Ramai daripada kita tidak memahami apa itu sedekah. Padahal, sekiranya kita menyelami dan mendalaminya dengan bersungguh-sungguh, hakikat sedekah mampu membuka dan mencerahkan hati dan fikiran kita.

Sedekah mengandungi kekuatan ataupun keajaiban yang dahsyat, bukan hanya dalam konteks kehidupan di dunia, malah dalam konteks kehidupan di akhirat juga.

"STATISTIK...SEGALANYA PASTI"

Tak kira walau apa
Cabaran dan aral melintang
Statistik meringankan
Segala beban yang menjelma
Gementar tiada

Bersama kita teguh hadapi
Bentala dipenuhi misteri
Namun statistik kan
melindungi
Statistik petunjuk realiti

Kesejahteraan negara
Perpaduan seluruh bangsa
Dengan irama data

Tidak hanya berbicara
Pagi hingga ke senja
Semangat yang terus membara
Data dan kehidupan berteraskan harapan
dan impian kemakmuran

Segalanya PASTI
Bergalaskan strategi
Menuju aspirasi
Harapan.. Keamanan
Impian... Kedamaian
